

Sedara is Your Cybersecurity Sidekick.

Whether you're a CEO looking for a cybersecurity program, or a CIO looking for help, you need a partner in cybersecurity to create a Cybersecurity Development Program. A program for your organization that reduces risk, improves security, and meets Governance, Regulation, and Compliance.

Attainable Cybersecurity for All Cybersecurity Development Program (CDP)

- Governance, Regulation and Compliance
- Virtual Chief Information Security Officer
- Virtual Security Engineering
- Security & GAP Assessments
- Vendor Management

Virtual CISO (vCISO)

Works with your Executive, Managers and Technical teams to:

- Develop the Cybersecurity Development Program
- Define and manage an appropriate roadmap and strategy while remaining vendor agnostic
- Execute the strategy. Whether you have an immediate threat or road map vision, we not only recommend the work, we are here to do it
- Provide security-driven and (GRC) risk assessments
- Provide GAP assessment and analysis
- Advise, Document, Report and Present to all levels within your organization

Virtual Security Engineer (vSE)

Works with your technical IT operational and security teams to:

- Provide hands-on management and security engineering
- Reduce Attack Surface
- Respond, research and remediate cyber incidents
- Scalable remediation
- Compliance based Frameworks

The vCISO and vSE work together to execute and implement the program with your internal team. The program is mapped to the NIST 1.1 Cybersecurity framework and promotes.

Continuous Improvement

Innovative and flexible approaches that provide meaningful, value-added security services.

- Support the Cybersecurity Development Program in a flexible way
- Help carry out the strategy with your organization
- Provide technical know-how and guidance on tasks related to the program
- Provide hands-on technical help to support the program when necessary

Ensure Your Compliance

Eliminate the guesswork of Governance, Risk Management and Compliance (GRC)

NIST CSF 1.1 • CMMC • GDPR • HIPAA • NERC CIP • NIST 800-53
PCI DSS • Sarbanes Oxley Compliance • 23 NYCRR 500
