Sedara is Your Cybersecurity Sidekick.

Our communities are adopting technology faster than they can keep everything secure and this fundamental problem currently does not have an easy solution. This uphill battle drives us to bring honed cybersecurity expertise, strategies, and manpower to as many organizations as possible. Sedara Security was founded in 2013 to streamline practical and effective cybersecurity for organizations of all sizes. We are headquartered in Buffalo, NY and we truly live and breathe cybersecurity.

Sedara Has Your Back.
While You Save the Day.

Whether you're a CEO looking for a cybersecurity program, or a CIO looking for help, you need a partner in cybersecurity and threat intelligence. Our experienced team will enable you to take your cybersecurity and compliance to the next level with 24/7/365 monitoring, detection, and response.

Prepare
Sedara uses years of experience combined with trillions of events logged and analyzed to prepare your organization for when (not if) a threat occurs.

Detect
Sedara utilizes behavioral analytics & machine learning to detect critical threats as well as suspicious activity on your network.

Eliminate
When a threat has been detected, Sedara's expert SOC team immediately employs our advanced response capabilities to neutralize and eliminate the attack.

Enhance
Once a threat has been eliminated, Sedara will then utilize the data and behavior of that attack to ensure your network is immune to similar threats.

Our Services

You and your customers take cybersecurity seriously.
So does Sedara.

Achieving compliance with various industry or governmental regulation and legislation is a good start. Sedara is designed to then ensure your organization is prepared to detect and eliminate threats to your network, while maintaining compliance throughout.
